Therefore, read the use Never use this thermometer To avoid gross temperature dif The measurement will Ear temperatures accurately. Ask your question here. Provide a clear and comprehensive description of the issue and your question. The more detail you provide for your issue and question, the easier it will be for other Braun Thermoscan IRT 4520 owners to properly answer your question. Ask a question I have a braun thermoscan 4520. I purchased this unit about 6 years ago and it worked fine until about two months ago. No matter how I place the thermometer in my ear I only get the POS error. Ive cleaned the unit as well as changed the batteries and used new caps but it still gives me this error. Other than the position not being correct which cannot be my case as I know very well how to position the thermometer could this error be caused by maybe the unit finally reaching its end of life. Any help on how to get rid of the POS error to get this unit working again would be greatly appreciated. I purchased this unit about 6 years ago and it worked fine until about two months ago. Reload to refresh your session. Has been amazing, but a month ago batteries ran out. Changed them and it took me 20mins to get it to do any reading. We guessed out by half degree. Took to local braun agent in Palmers ton North. Wont calibrate over 0.3degree. Also cant prove bought from nz dealer as baby gift and its out of warranty. We offered to pay but they wont touch it they phoned braun in front of me. Braun refused the fix. Took to docs yesterday. Out 0.81degree. Whats the point of selling a product you wont fix. Surely you should be able to change the batteries without it becoming inaccurate. Cant afford another braun. Not sure where to go next. Hoping kids dont get sick. Like Share More Similar opinion. Write a review on ProductReview.com.au ! Trevor Melbourne This occurred about 4 occasions over 4 years. The batteries were new and we always used new disposable probe covers. While this is now out of manufacturers warranty in my view this device, which is expected to be of high quality based on the manufacturer and purchase price, is not fit for purpose if it fails after such a small amount of use. Very disappointed. Like Share More Similar opinion. Write a review on ProductReview.com.au ! Like Report Similar opinion. Write a review on ProductReview.com.au ! ALB 3 reviews 2 likes It is super easy to use and doesnt take long at all, but the biggest pro for me is the fact that I know the result I see on the screen is pretty accurate. How easy it is to use, how reliable it is. Brings peace of mind knowing the reading is accurate. The only thing I would do to improve it is make the screen backlit for when you are taking temperatures at night. Like Share More 1 comment Customer Service Braun 5 years ago Hi ALB, thankyou for taking the time to leave your feedback on the Braun ThermoScan we pride ourselves on accuracy so its great to hear you find it reliable.

Compare all Rashelle Bonney I had children under 3 and found this extremely valuable to my home and I wanted my close friends and relatives to also have peace of mind and own one in there home. Works without waking the infant or child, Accurate and trustworthy product Like Share More Similar opinion. Write a review on ProductReview.com.au ! Inal NSW, 2263 16 reviews 26 likes This model enjoys widespread confidence and use by medical professionals and I have used same in aged care facilities as it is very fast, accurate and reliable

without causing distress to the patient due to long period obtaining result or in case of infants or restless children, the need to remain still long enough to obtain an accurate result. This model doesn't hold historical data in. Read more memory or allow download of results to computer patient record database as more expensive variants of this model allow, but for personal or first aid use it is superb. This model utilises disposable lens filters as a hygiene measure to prevent cross infection between patients and the maker recommends a fresh filter be used each time, which can be expensive so some will choose to use same lens filter for longer period within family until actual results indicate a fever or illness is present. The unit preheats the sensor to approximate normal range of human body and beeps when ready to be inserted in the ear to obtain a measurement by reading the actual infrared heat present in the inner ear canal tissues.

The thermometer turns itself off after a short period to conserve batteries and comes with a clip on plastic cover to protect the sensor probe, and a sturdy zip carry case to store unit and spare lens filters when not in use. Takes 2 X AA alkaline batteries to operate with long service life between changes. The unit is factory set to display Celsius temp but can be changed to Fahrenheit display by user. Quick, Accurate, Minimally invasive, Hygienic, Runs own self calibration and system diagnostics when turned on before using to ensure accuracy. Expense of disposable lens replacements when used in accordance with manufacturers directions. Its super easy. And Inal. thankyou. WOW what a thoro. Read more ugh and intelligent review. Were glad you took the time to give your feedback, and just wanted to leave our thanks. Like Report Similar opinion. Write a review on ProductReview.com.au ! BKeight Melbourne 4 reviews We consider it an investment. I dont replace the ear cap each use if I am just using it for bub. Seems like by the time we brought one cheap thermometer and then probably another to replace it coz it was rubbish we may as well have just got the good one from the getgo. Highly recommend. Like Share More Similar opinion. Write a review on ProductReview.com.au ! A.K73 AU Its very easy to use and because of the sensor you always know that you have taken the reading correctly. The instruction booklet has a table with body temperature ranges which is handy to know too. As for the covers, Im using it on the baby only so theres no need to constantly change them. I do wish that it had a display light to make night time readings easier and a little carry case would be nice too. Simple to use 1 like Share More Similar opinion. Write a review on ProductReview.com.au ! virles93 VIC, 3193 32 reviews 12 likes We have since changed to the Braun thermometer and will never go back.

It is hygienic, ultra precise and gives you the confidence that you know your babys temperature when they are unwell. My daughter is used to get her temperature taken with it and never complains. I compared this one to the other one I had bought and it is incomparable. Dont waste money. Read more on other thermometers like me, go straight to the best, you will use it a thousand times so it is worth the investment. Precise, easy to use, hygienic. I wish the display had a button to light it up in the dark. Like Share More Similar opinion. Let me see if I can find out why. Carla from Braun Like Report Customer Service Braun Thermometers 4 months ago Hi Emma they should be back in stock soon. We just got a shipment thats going out to stores. Check Chemist Warehouse, Priceline, Baby Bunting online in the next week or two. I got contact with water just now and I removed the battery and dry the unit. Unit is showing Error and sometime display is blinking. ProductReview.com.au has analysed a years worth of opinions from over 6,500 Aussie mums and dads to published our Awards for the best baby products in 2020. See the top rated prams, car seats, carriers, and breast pumps to spoil yourself and your baby with this summer! Nathan S. Oct 29, 2019 Listing monitored by Braun Thermometers representatives. ProductReview.com.au has affiliate partnerships. August 2006 1133 11 The Braun ThermoScan thermometer has been carefully developed for accurate, safe and fast temperature measurements in the ear. The shape of the thermometer probe prevents it from being inserted too far into the ear canal which can hurt the eardrum. However, as with any thermometer, proper technique is critical to obtaining accurate temperatures. Therefore, read the use instructions carefully and thoroughly. How does Braun

ThermoScan work. Braun ThermoScan measures the infrared heat generated by the eardrum and surrounding tissues.
